The Human Development Index (HDI) measures average achievement in key dimensions of human development. It is based on life expectancy at birth, average duration of education and GDP per capita. It ranges from 0 to 100. 'High human development countries' (UN) are in the range between 70 and 80. Data values are for 2022.

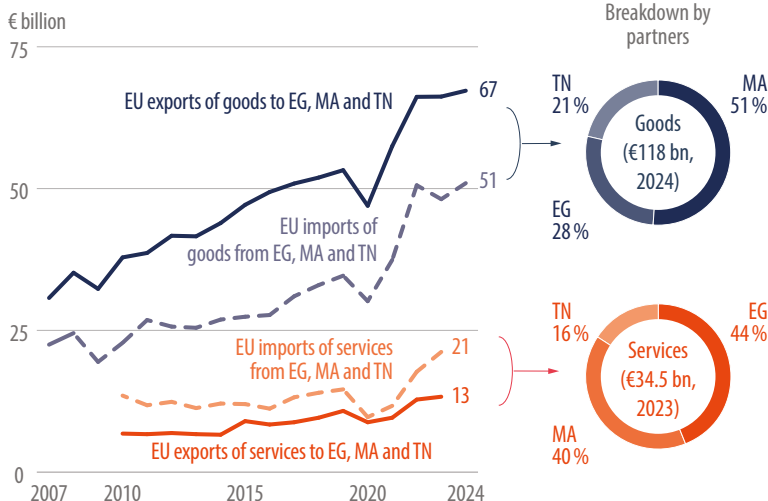

The Corruption Perception Index measures perceived levels of public sector corruption worldwide. Scores range from 0 (highly corrupt) to 100 (very clean). Data values are for 2024.

The GINI index measures deviation in distribution of income among individuals or households within a country from a perfectly equal distribution. It is a measure of inequality in income distribution. A value of 0 represents absolute equality, a value of 100 absolute inequality. Selected data values are for 2000 (MA), 2019 (EG) and 2021 (TN, BG, SK).

EU Member States with the highest and lowest values are labelled for comparison. Background data values are for the world (HDI, CPI), or for the 27 EU Member States (GINI).
